

DC40 Origin

DC40 is a lightweight upright vacuum featuring Dyson Ball™ technology; enabling it to navigate around furniture and tight spaces. DC40 features Radial Root Cyclone™ technology, which means it has remodeled airflows to maximize suction power, and a cleaner head that self-adjusts for optimal contact with all floor types.

DC40 Origin features Radial Root Cyclone™ technology that maximizes suction power for no loss of suction. A mesh shroud helps separate large debris while the inner cyclones generate powerful centrifugal forces, extracting microscopic particles like pollen and mold. It also features a self-adjusting cleaner head--the base plate automatically adapts to all floor surfaces, creating a seal to remove dust from carpets and hard floors, while protecting delicate surfaces. Long bristles penetrate deep into carpet to remove ground-in dirt. Shorter bristles sweep the carpet to remove surface dust, fibers and pet hair. DC40 Origin has Ball™ technology. Ducting on the outside of the ball has been miniaturized to fit inside the ball, making it easier to steer around furniture.

The DC40 Origin is engineered with materials that are selected for their strength and durability. Additionally, this vacuum comes with a combination tool that has soft bristles for gentle dusting and a stair tool for removing dirt and dust from corners and vertical edges of stairs. It also includes a 5 year warranty, parts and labor guaranteed by Dyson.

Rides on a ball. No loss of suction

Radial Root Cyclone™ technology

Airflows remodeled to maximize suction power.

Self-adjusting cleaner head

Self-adjusts to create an efficient seal with every floor type, reducing air leaks and maintaining suction power.

Ball™ technology

Housing more components inside the ball reduces clutter around it – steers right up to edges and into difficult places.

Instant release wand

Wand and hose stretch up to 5 times in length for stairs and hard to reach places.

Captures allergens, expels cleaner air

DC40 captures microscopic particles such as pollen, mold and bacteria.

Motorized brush bar

Independent motor drives the brush bar for better cleaning performance. It's also easy to maintain.

Fingertip controls

To instantly turn the motorized brush bar off for hard floors, delicate floors and rugs.

Washable lifetime filter

No need to buy replacements.

Clear bin

Made from tough polycarbonate—the same material as riot shields. Empties with the push of a button.

Pedal-free automatic recline mechanism

Simply recline and go.

No belts to replace

Timing belt doesn't slip and is guaranteed for 5 years

5 year warranty

Parts and labor guaranteed by Dyson

Includes:

Combination tool- reaches further and has soft bristles for improved spot cleaning and gentle dusting

Stair tool- removes dirt and dust from corners and against vertical edges of stairs
