

WC-IZ ELITE

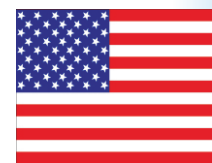

Get the clean, refreshing water you deserve with the WC-IZ Elite system. Innovative in design, the WC-IZ Elite system provides a simple, effective solution requiring no chemicals or salt for regeneration. The blend of media used effectively remove sulfur, hydrogen sulfide gas, iron, heavy metals, and other taste affecting contaminants. The media bed also reduces turbidity in your water and has properties which inhibit bacteria growth.

The WC-IZ Elite system is a single tank solution, taking up much less space than the unsightly contact tank and aerator tank solutions. Also, being a closed system, it does not have the unsanitary and algae growth problems that come with open air aerators.

Removes sulfur, iron, and that “rotten egg” odor in a single solution

- No harsh chemicals
- No costly chemical pumps
- No unsightly contact tanks and unsanitary aerators
